

APPLICATIONS:

- Small/mid-sized PA systems
- Halls, auditoriums, amphitheaters
- Bars, restaurants, clubs
- Gymnasiums, fitness centers, and dance studios
- Houses of worship
- Mobile DJ systems and weddings
- Special events, and presentations
- Rentals

FEATURES:

- 800 Watts Class D power
- 15" low frequency transducer, 1" neodymium driver
- 2 Mic/Line combo inputs with independent volume controls
- XLR output to link speakers
- Lightweight, trapezoidal cabinet with handles
- 100° x 60° Long throw coverage field
- Stand/pole mountable or flyable
- Clip Limiter with red LED
- Ground Lift switch
- Contour switch for increased EQ control
- Accurate audience coverage, not just on-axis
- Designed and tuned in the USA

ACCURACY. POWER. PORTABILITY. AFFORDABILITY.

These are the cornerstones of TRUESONIC speakers, which provide exceptionally transparent sound for musicians and live sound engineers alike. TRUESONIC speakers enlist their ultra-pure signal path, super-efficient driver design, and durable, lightweight polypropylene enclosures to deliver precise reproduction of deep lows, crystal-clear high-end and smooth mid-range. With TRUESONIC speakers, what you put in is exactly what you get out.

TRUESONIC TS115A

The TS115A features modern Class D amplification integrated into the cabinet. Class D amps are generally lighter than Class A and AB amplifier designs and offer substantial power for nearly any application; the TS115A delivers 800 Watts of Class D power. Both the 15" low frequency and 1" high frequency drivers in the TS115A are designed to make sure that virtually no energy is wasted. That translates into more of the power from the amplifier actually working to generate sound rather than heat, giving the TS115A better real-world performance than other loudspeakers with comparable published specifications. Inside and out, every component of the TS115A was developed to provide accurate, transparent, powerful sound.

SPECIFICATIONS

Transducer Low:	15" Woofer, with 2" voice coil
Transducer High:	Neodymium compression driver, 1" exit with 1" voice coil
Power Amplification:	800 Watts peak (670 W LF + 130 W HF) 400 Watts continuous (335 W LF + 65 W HF)
Frequency Range (-10 dB):	42 Hz -20 kHz
Frequency Response (±3 dB):	53 Hz -19 kHz
Maximum SPL @ 1 m :	126 dB peak, 123 dB continuous
-6 dB Nominal Coverage:	(80° / 100° H x 60° V)
Active Crossover:	2.5 kHz
Connectors:	2 x Mic / Line Female XLR - 1/4" combo inputs 1 x Loop - Out Male XLR
Input Control:	Line / Mic -∞ to +50 dB Maximum input level +23 dBu, Input Impedance 15 kOhms
External Controls:	Volume, Power switch with LED indicator, Clip/Limit LED, Ground Lift switch
Protection Features:	Over-excursion, Thermal, Driver
AC Power:	100 VAC, or 110 – 120 VAC, or 220 - 240 VAC (50 / 60 Hz)
Enclosure:	Trapezoidal, with floor monitor capability. Injection molded polypropylene enclosure, with perforated steel grille.
Mounting:	Integrated pole-socket (36 mm dia.) Two handles, 6 M10 threaded sockets: 2 top, 2 bottom, 2 pullbacks
Dimensions (HxWxD):	26.8" x 16.9" x 15.2" (679 mm x 430 mm x 385 mm)
Weight (Net/Shipping):	39.6 lbs (17.98 kg) / 45.37 lbs (20.58 kg)
